Creating Google Bookmarks

**Note:** You must have a Google account to create and access Google Bookmarks.

Open Google search and type in “Bookmarks”. Your first choice should be “Google Bookmarks.”

Once you have found a site you are interested in bookmarking (in a separate window or tab), you will be able to begin creating bookmarks.

Select the add bookmark link at the bottom of the page.

Copy and paste the title and the URL into the first and second lines. You will have to create your own labels for the site – these are words that will help you locate the site, as well as create categories of sites.
The bookmarks will be accessible anywhere as long as you are signed into your Google account.
