Mobile Learning with Blooms Taxonomy and the Pedagogy Wheel

Developed by Cherie Pickering
Unley High School (October, 2012)

Acknowledging the Concept Development

This representation of the tools used by teachers and students, at Unley High School, is an adaptation of The Pedagogy Wheel, developed by Allan Carrington of the University of Adelaide. This innovative tool, in turn, was built upon the work of Sharon Artley (see Paul Hopkins website mniweb.org.uk), itself an adaptation of Kathwolh and Anderson’s (2001) adaptation of Blooms (1956).

The idea to develop it for Unley High School came from a desire to visually represent some of the ways in which the Apps, required by our Middle School students, are used as 21st Century teaching and learning tools.
The Pedagogy Wheel

Developed by Allan Carrington
University of Adelaide

Standing on the Shoulders of Giants

This Taxonomy wheel was first discovered on the website of Paul Hopkins educational consultancy website mmiweb.org.uk. That wheel was produced by Sharon Artley and was an adaption of Katnwohl and Anderson’s (2001) adaption of Bloom (1956). The idea to further adapt it for the pedagogy possibilities with mobile devices, in particular the iPad, I have to acknowledge the creative work of Kathy Schrock on her website Bloomin’Apps.
